Image Composite (existing metaphor) Animation Composite	Animation Composite
Pixel	Animation channel, or animation curve, or Degree of Freedom (DOF), or a floating point number changing over time.
Layer	An animation, a collection of animation channels over time, a Skill.
Transparency	An animation in a layer can be sparse; it does not need to "touch" every channel. Empty animation channels correspond to transparent pixels.
Blend mode	Applies to animation data as well, determines the type and percentage contribution of each layer.

	Positive	Negative
Temperament	User interacting in a happy, positive way with the character	User encourages sad or bored behavior in the character
Pervasiveness	User's positive interaction with character continues throughout virtual worlds	User's negative interaction with character continues throughout virtual worlds
Permanence	The consistency with which the user interacts in a positive way	The consistency with which the user interacts in a negative way
Aid	User increases character's level of happiness	User allows and does not stop negative influence of antagonist
Nourishment	User feeds a healthy, good, often "branded" food to the character	User feeds a sickly food to the character
